## FEMALE & BULL AUCTION

590F

659F

# MEMORIAL DAY

**MONDAY MAY 30, 2022**

At White Hawk Sales Facility || 4765 Hwy 27 Buchanan Georgia

# REMEMBER AND HONOR

**WHITE HAWK RANCH**

*We want to thank you for joining us on Memorial day and Welcome to White Hawk Ranch's May 30th Female auction of all our fall calving cows ages 3 to 5 years old and their heifer calf's. You have the advantage of 3 generations of White Hawk Ranch's breeding program including the cows, heifer calf's and the calf's they are carrying.*

*Note: Four females that we sold in 2019 & 2020 have ROI 550 for the buyer's.*

*Join us Sunday night May 29th We will celebrating several milestones this year in the Hedrick Family. Patsy and I both turn 70. We have been married 50 years and our construction company has been in business for 30 years. The Hedrick family has been affiliated with Hereford Cattle for 96 years with Perry Hedrick starting Diamond Dale Farm in 1926!*

*We would be honored to have you as our guest!*

*Sincerely,  
Hedrick Family and WHR Crew*

**To celebrate these milestones, we are having Grammy Nominee **CRAIG BARNHILL** entertain us Sunday evening, May 29th from 7:30 to 9:00PM. SOUNDS FROM NASHVILLE**

**Hit Songs and the Stories behind them**  
Featuring Grammy Nominated Hit Songwriter Greg Barnhill with Special Guests.

*Originally from New Orleans, Barnhill has been writing and performing his entire life. Artists from Etta James, Martina McBride, and Jessica Simpson to Chicago, Vince Gill, Tim McGraw as well as many others have recorded his songs. "Walkaway Joe," recorded by Trisha Yearwood and Don Henley, was a significant milestone to Greg's career. The song went on to earn him a Grammy nomination. Barnhill also had a crossover smash with "House of Love" for Amy Grant and Vince Gill. You will not want to miss this amazing songwriter show similar to the legendary Bluebird Cafe' in Nashville.*

7:30-9 PM..... Entertainment by

Grammy Nominee Craig Barnhill

**SATURDAY, MAY 30TH**

Cattle available to view at 9:00 AM EST

Lunch at 11:00 AM EST

12:00 PM EST ..... Sale Starts

Load out after sale

**SALE DAY PHONES**

Sale Barn (678) 905-0017

Gary Hedrick (678) 858-0914

Diego Gutierrez (678) 629-1804

James Atkins (404) 922-6508

**AIRPORT**

Atlanta, GA • Located 1 hour from White Hawk Ranch

Birmingham, AL • Located 2 hours from White Hawk Ranch

*"Because Every Bid. Counts"*

THE FASTEST REAL-TIME ONLINE BROADCASTING BIDDING AND VIEWING

- Go to [www.liveauctions.tv](http://www.liveauctions.tv)
- Find your sale (listed in date order)
- Click "watch this event" (will take you to login page)
- If you have an account log in, if not click "create new user"

After logging in, you are able to view the sale. If planning to bid, register for a buyer number by clicking "register for a buyer number" in the top right-hand corner. Fill out the registration information, and click "register now". You will then be "pending approval". Once approved, a bidder status approval email will be received and the bidding number will appear in the top right of the sale page. We recommend registering for a buyer number at least 24 hours in advance of an auction. Sale day requests may still be accommodated.

Buyers :: post sale, contact the sale host or management team for payment & shipping

Proxy Bidding :: for those not able to watch in real-time, bids can be placed using the blue video tabs on the right of the log in screen.

Support :: for support during the sale broadcast, chat live with one of our representatives. Otherwise, our support team is available @ 800-431-4452

For those users on a phone or tablet download the LiveAuctions.TV App

# Terms & Conditions

- TERMS:** Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchasers during or immediately after the sale and will not be released until settlement has been made. Each animal will be at the purchaser's risk immediately after the animal is sold.
- REGISTRATION CERTIFICATES** of the animals will be transferred to the buyer at the seller's expense. All calves born before the sale will be registered by the seller. All calves born after the sale will be registered by the buyer. Each buyer must be sure to give the clerk his proper name and address for making transfers. All certificates will not be furnished by the seller on females carrying the service of non-owned AI sires.
- EPDS:** The EPDs included were current as of 4/11/22. The most current information can be viewed on [www.hereford.org](http://www.hereford.org).
- HEALTH:** All cattle selling will have interstate health charts required for shipping into other sections of the United States. All females who are old enough are officially calthood vaccinated.
- GUARANTEE:**

Bulls – All Bulls have passed a breeding soundness exam (BSE) and have been trich tested negative. Bulls are fully guaranteed (see limited warranty) for 1 year, except for mortality. (Mortality insurance is available.) **Limited warranty:** if a bull needs to be replaced, a like animal will be substituted or a credit purchase price less salvage value of the animal will be applied toward a future purchase in our next sale.

Females - Females sold in this sale are guaranteed to be breeders. A properly handled and cared for animal that fails to breed within six months of sale date, may be returned if the buyer notifies the seller in writing by June 1st, 2023. The seller will have one 90-day breeding season to determine pregnancy. If at the end of that time the animal fails to breed, a like animal will be substituted or a credit purchase price less salvage value of the animal will be applied toward a future purchase.

All females selling that are determined to be safe in calf will sell that way and will carry no further guarantee.
- LIABILITY:** All persons who attend the sale do so at their own risk and the owners and sale manager assume no liability, legal or otherwise, for any accidents that may occur.
- ANNOUNCEMENTS** at the sale ring by the owners or auctioneer concerning the cattle will take precedence over statements in the sale book.
- INSURANCE:** Sheila Jensen Livestock Agency-Liberty Mutual Insurance (785) 262-1116.
- DELIVERY:** Delivery trucks will be available sale day. White Hawk ranch will deliver on a pro rate per mile.
- ORDER BIDS:** Order bids may be handled by the owners or any of the sale staff. Please feel free to call LiveAuctions.
- DONOR FEMALE CO-OWNERSHIP:** Donor will stay in the possession of WHR for management and daily care. First natural calf on yearling heifers will be joint owned.

Cow's with fall calves at side calf will be jointly owned  
All eggs produced via conventional will be divided by ownership percentage.  
All conventional flushes will be performed at WHR Dixieland Embryo Transfer.  
All embryo expenses will be shared jointly by % of ownership. (WHR labor or tect is at no cost)  
Co-Owners will have option of putting eggs in their own receipt or will have access to WHR Co-op herd to raise ET to 7 months of age. (See Gary for Co-op Herd Information)  
Each succeeding Natural Heifer calf will be 100% owned by WHR for the daily care and management of Donor (If bull calf will be owned by % of ownership). WHR assumes no liability
- FLUSH INFORMATION**
  - Buyer pays flush expense for ET veterinarian
  - No charge for White Hawk Ranch Sires
  - Outside Bulls at Buyer expense
  - Guaranteed 6 freezable eggs
  - Guaranteed three 60-day pregnancies
  - Implanted by Certified ET Technician

Gary and Patsy's grandchildren Christmas 2021.

# Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 15 traits and calculates four profit (\$) indexes. Research is ongoing to develop traits for fertility, feed intake and docility.

Today, DNA-marker tests can be used to enhance the accuracy of Hereford EPDs. AHA blends marker information with phenotypic information and pedigree to produce a GE-EPD. Look for the GE-EPD logo denoting an animal has been tested.

The current suite of Hereford EPDs and \$ indexes includes:

## Calving Ease – Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

## Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

## Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

## Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

## Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

## Maternal Milk & Growth (M&G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull's daughters with a M&GEPDof10lb.(29minus10=19 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

## Maternal Calving Ease (MCE)

MCE EPD predicts how easily a sire's daughters will calve at 2 years of age and is measured on a percentage. For example, if sire A has a MCE EPD of 7 and sire B has a MCE EPD of -3, then you would expect on average if comparably mated, sire A's daughters would

calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

## Mature Cow Weight (MCW)

The MCW EPD was designed to help breeders select sires that will either increase or decrease mature size of cows in the herd. The trait was developed after years of cow weight data collection and the EPD relates directly to the maintenance requirements of a cow herd. For example, if sire A has a MCW EPD of 100 and sire B has an EPD of 85, then you would expect the females of sire A, if mated to similar cows, to be 15 lb. heavier at mature size.

## Udder suspension (UDDR)

UDDR EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a UDDR EPD of 0.4, and sire B has a UDDR EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score better udder suspension in daughters of sire A, compared to sire B.

## Teat size (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

## Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

## Carcass Weight (CW)

Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPDof84andsireBhasaCWEPD64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

## Rib Fat (FAT)

The FAT EPD reflects differences in adjusted 365-day, 12th-rib fat thickness based on carcass measurements of harvested cattle. Sires with low, or negative FAT EPDs are expected to produce leaner progeny than sires with higher EPDs. Ultrasound measures are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

## Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

## Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

## Baldie Maternal Index (BMI\$)

BMI\$ is a maternally focused index that has a production system based on 1,000-Hereford x Angus females with a progeny harvest endpoint directed toward Certified Hereford Beef (CHB®). This index is more critical of CE than the Brahman Influence Index (BI\$) and also has significant weight on fertility. There is positive weight on WW and a slightly negative weight on YW, which promotes early growth and then a slow down on growth to keep mature size manageable. The emphasis of IMF is greater than the emphasis of REA. This is true because of the price difference of the Choice-Select spread and the fact that there is very little incentive to produce cattle better than a Yield Grade 3. This index is geared to service any commercial program that has British- cross cows.

## Calving Ease Index (CEZ\$)

This is a general purpose index that focuses on identifying bulls that can be used on heifers and then ultimately the calves will be marketed through the CHB program. As you might expect, CE and MCE carry significant weight in this index along with fertility. There is very little weight put on growth traits and less emphasis on carcass. Remember, this is a general index that is specifically designed to be used in a heifer program.

## Brahman Influence Index (BI\$)

BI\$ is a maternally focused index that is based on a 1,000-head cow herd of Brahman x Hereford cows. The progeny for this index will be harvested in a commodity-based system since CHB does not accept Brahman-influenced cattle into the program. This index has less emphasis for CE than any of the other indexes. There is emphasis on both REA and IMF since the cattle will be harvested through a commodity market. The largest emphasis is in fertility, which is measured solely by SC at the present time. Obviously, the target for this index is the producers in the Southern regions of the U.S. where the bulls are typically sold to commercial cattlemen that have Brahman-influenced cow herds.

## Certified Hereford Beef Index (CHB\$)

This is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so they need to be born alive and then grow fast at all stages of life. Of course, we have much more emphasis on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. It could be used heavily in the Midwest where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or are simply sold to backgrounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.
